INTRODUCTION

Over the years Alberta Environment has collected lake level information at numerous lakes throughout the Province. In 1982, 222 lakes were monitored. Historically this information has been collected for internal use and filed in the Technical Services Division Records Centre. In an effort to present these data in a more convenient form, and make them available to more users, it was decided to produce an annual summary of the information gathered.

This data report contains all the lake level data collected by the Technical Services Division in 1982. Similar reports have been produced for 1978, 1979, 1980 and 1981. Publications containing 1976 and 1977 data will be available in 1983.

It should be noted that continuous lake level data collected by Environment Canada, Alberta Environment and various contributing agencies is published separately by the Water Resources Branch, Environment Canada in their annual publication Surface Water Data, Alberta. A list of these lakes is presented on page xii and xiii.

Purpose and Method of Data Collection

Most of the lakes in this report are monitored to obtain an indication of maximum and minimum levels during the year. In order to do this, levels are obtained by means of an engineer's level referred to a local bench mark. Levels are checked in the winter, the late spring, mid-summer and the fall. In some cases more frequent observations are taken for a specific project. This is done by installing a staff gauge and hiring an observer to read the gauge. All readings taken either by level or staff gauge are actually instantaneous observations, but they are assumed to represent the mean water level of the day.

Presentation of Data

The data presented are compiled by computer, using the MANUAL program obtained from Environment Canada. The use of this program is gratefully acknowledged. It should also be noted that the annual publication entitled "Surface Water Data", published by the Hydrology Branch of Saskatchewan Environment, has been used as a guide in the preparation of this data report.

The station numbering system adopted is the same as that used by Environment Canada. The first two numbers identify the major drainage basin in which the station is located and next two characters indicate the sub-basin, and the last three digits the number of the station. To avoid duplication of Environment Canada numbers, all Alberta Environment station numbers start with nine. The major drainage basin in Alberta are identified as follows: Mackenzie River (07), Saskatchewan-Nelson River (05), Churchill (06) and the Missouri (11).

The lakes are arranged in alphabetical order, a brief station description is followed by the data for the year. A map to illustrate the distribution of the lakes monitored, and also to show the approximate location of each lake is also included. A separate numbering system is used to identify the station on the map. The map numbers for each station are given on the index page.

A historical summary is included on each data page. This summary includes the maximum and minimum for all years of data including the current year.

Accuracy of Data

Lake levels have been referenced to geodetic datum wherever possible and while many of these bench marks have been verified in recent years, it has not been possible to run checks on all bench marks used. The relative fluctuation of water level is not in question. However, if it is important to the user that the absolute geodetic elevation of the lake be correct, it is suggested that the user contact the Technical Services Division at the address given below whereupon an

effort will be made to verify the accuracy of the bench mark used. It would be appreciated if any errors detected in geodetic elevations were brought to the attention of the Division.

Hydrographic maps as mentioned on the station description sheet vary in the accuracy of horizontal and vertical control. For further information contact the Technical Services Division Record Centre

The number of significant figures used in presenting the data has been standardized. It should not be assumed that the measurements were made with this degree of accuracy. The general practice is to read staff gauges to the nearest two millimetres.

All water levels given in this data report are in metric units. The approximate conversion to imperial units is as follows:

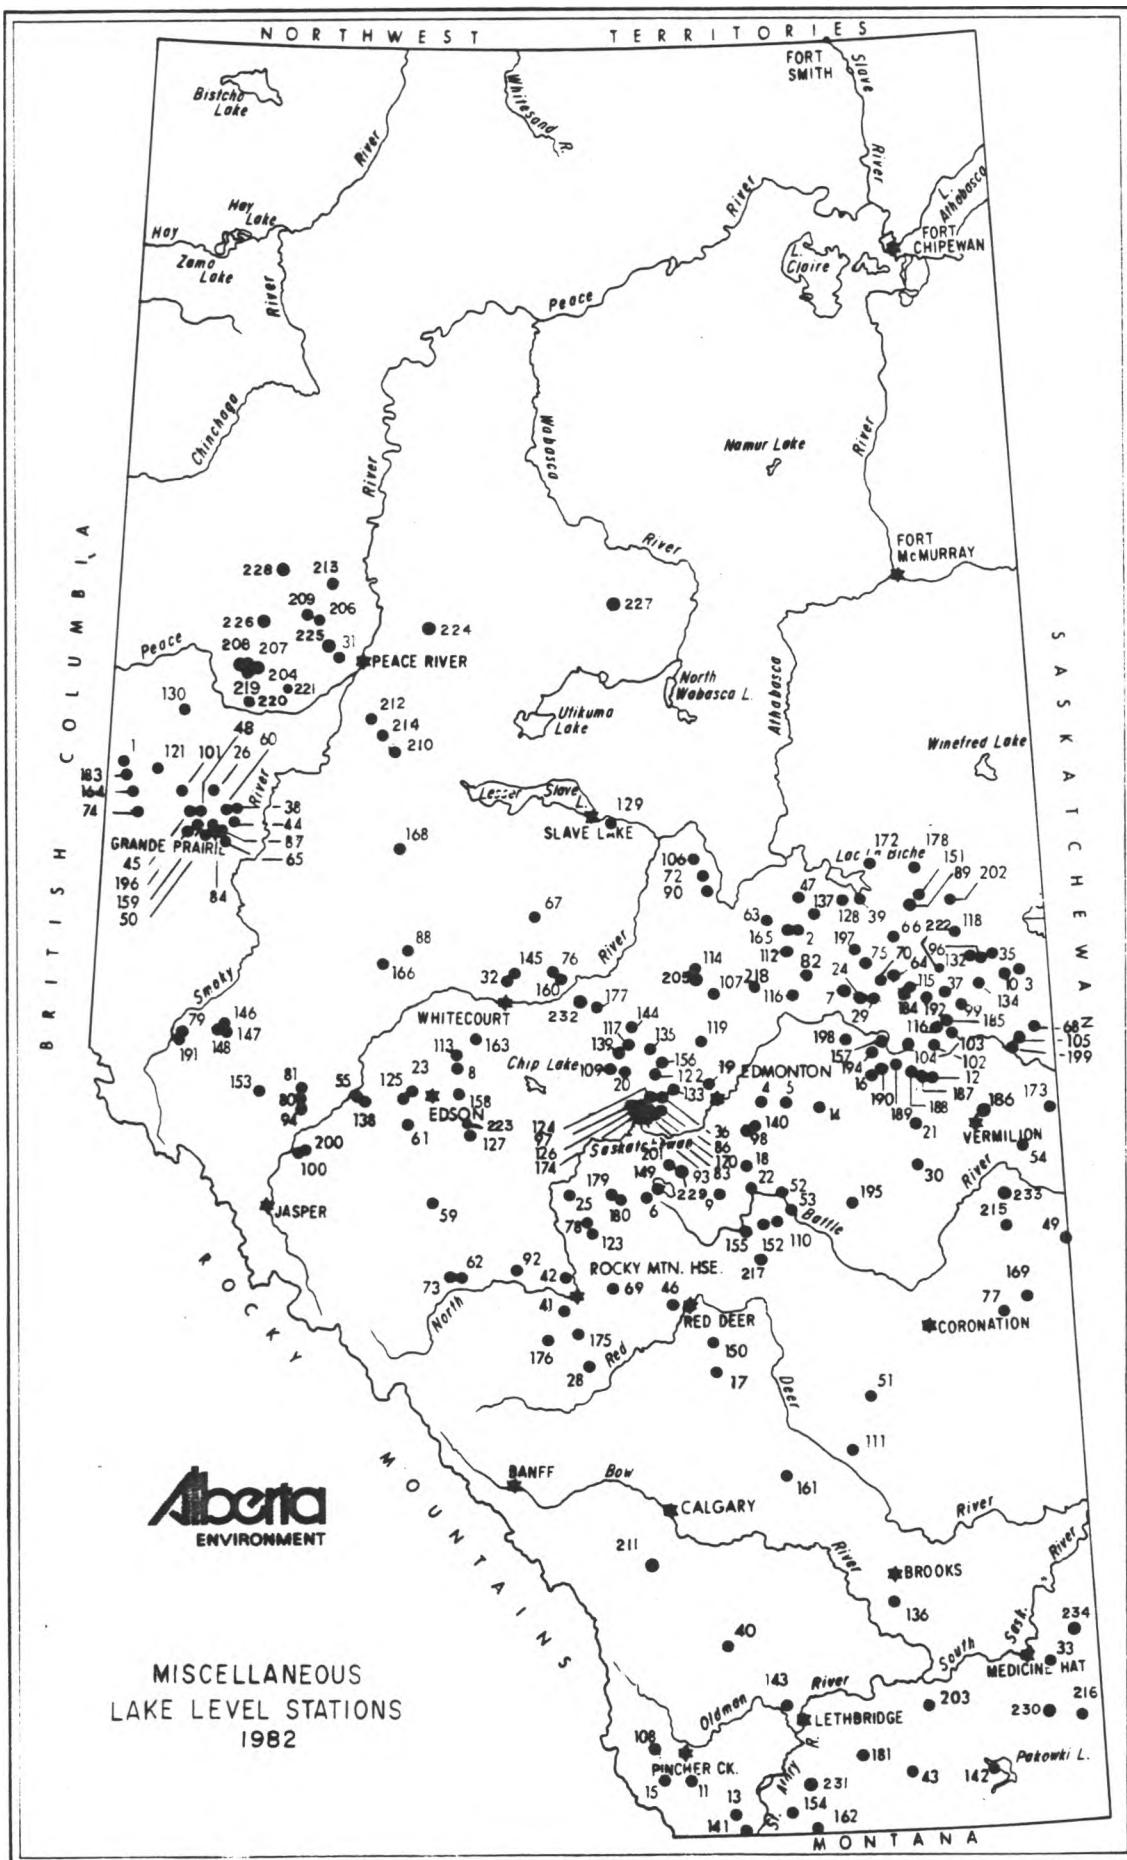

$$1 \text{ metre} = 3.2804 \text{ feet}$$

Further Information

It should be emphasized that this data report only contains data collected for one year, 1982. Similar reports have been produced for the years 1978 through 1981. In the Technical Services Division Records Centre there is a file for each station containing all the information collected over the years and more details on the exact location of the site. Anyone who requires more information on any of these stations is asked to contact:

Lake - Station Description

STATION NAME: BEAVERHILL LAKE near Tofield

STATION NUMBER: 05EB906

LOCATION: 51-17-W4 - 11.75 miles North and 1 mile West of Ryley.

GAUGE TYPE: None. Level established by surveying.

PERIOD OF RECORD: 1968-1982

HYDROGRAPHIC SURVEY MAP AVAILABLE:

YES/NO

REMARKS: Water Survey of Canada operated stations 05EB003 and 05EB008
in 1918-20; 1925.

There is a Ducks Unlimited Control Structure on this lake.

LAKE - STATION DESCRIPTION

STATION NAME: FLYINGSHOT LAKE near Grande Prairie

STATION NUMBER: 07GE908

LOCATION: 71-6-W6 - South West of Grande Prairie, approximately
1.5 miles South of Hwy. #2.

GAUGE TYPE: None. Level established by survey.

PERIOD OF RECORD: 1968; 1972-73; 1975 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE:

YES/NO

REMARKS: There is a Ducks Unlimited Control Structure on this lake.

LAKE - STATION DESCRIPTION

STATION NAME: FORK LAKE near Lac La Biche

STATION NUMBER: 06AA905

LOCATION: 63-11-W4 - South side of Fork Lake, 22 miles South and
18 miles East of Lac La Biche.

GAUGE TYPE: None. Level established by surveying

PERIOD OF RECORD: 1968 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE:

YES/NO

REMARKS: There is a Ducks Unlimited Control Structure on this lake.
A sheet pile weir was constructed in 1973.

Water levels assumed prior to 1979.

SUMMARY FOR THE YEAR 1982

MAXIMUM OBSERVED DAILY WATER LEVEL, 652.525 METRES ON JUN 1 MAX. OBSERVED WATER LEVEL, 652.578 METRES ON MAY 20/81

MINIMUM OBSERVED DAILY WATER LEVEL, 652.309 METRES ON OCT 5 MIN. OBSERVED WATER LEVEL, 651.963 METRES ON SEPT. 24/80
WATER LEVELS ARE REFERRED TO GEODETIC ELEVATION

HISTORICAL SUMMARY

MIN MAX

LAKE - STATION DESCRIPTION

STATION NAME: GEORGE LAKE (WEST) near Hines Creek

STATION NUMBER: 07FD917

LOCATION: 83-4-W6 - 1 mile East and 1.5 miles South of Hines Creek.

GAUGE TYPE: None. Level established by surveying.

PERIOD OF RECORD: 1980 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE:

YES/NO

REMARKS: There is a Ducks Unlimited Control Structure
on this lake constructed in 1974.

ALBERTA ENVIRONMENT
WATER SURVEY SECTION
EDMONTON, ALTA.

SUMMARY FOR THE YEAR 1982

MAXIMUM OBSERVED DAILY WATER LEVEL, 1151.462 METRES ON JUL 6

HISTORICAL SUMMARY
MAX. OBSERVED WATER LEVEL 1151.733 METRES ON JUN. 5/80

MINIMUM OBSERVED DAILY WATER LEVEL, 1151.129 METRES ON JUN 21
MIN. OBSERVED WATER LEVEL 1150.650 METRES ON JAN. 25/78
WATER LEVELS ARE REFERRED TO GEODETIC ELEVATION

LAKE - STATION DESCRIPTION

STATION NAME: JENSEN RESERVOIR near MAGRATH

STATION NUMBER: 05AE901

LOCATION: 4-22-4 - 1.5 miles West and 6 miles South of Magrath.

GAUGE TYPE: Staff Gauge.

PERIOD OF RECORD: 1967 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE: YES/NO

REMARKS: There is an Alberta Environment Control Structure on the outlet of this lake.

ALBERTA ENVIRONMENT
WATER SURVEY SECTION
EDMONTON, ALTA.

SUMMARY FOR THE YEAR 1982

HISTORICAL SUMMARY

MAXIMUM OBSERVED DAILY WATER LEVEL, 722.348 METRES ON AUG 12
MINIMUM OBSERVED DAILY WATER LEVEL, 722.016 METRES ON FEB 18
WATER LEVELS ARE REFERRED TO GEODETIC SURVEY OF CANADA DATUM
MAX. OBSERVED WATER LEVEL 722.348 METRES ON AUG. 12/82
MIN. OBSERVED WATER LEVEL 720.925 METRES ON NOV. 1/68

LAKE - STATION DESCRIPTION

STATION NAME: JOSEPH LAKE near New Sarepta

STATION NUMBER: 05EB903

LOCATION: 50-22-W4 - .5 miles North and 3 miles East of New Sarepta.

GAUGE TYPE: None. Level established by surveying.

PERIOD OF RECORD: 1969 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE:

YES/

LAKE - STATION DESCRIPTION

STATION NAME: PIGEON LAKE at Provincial Park

STATION NUMBER: 05FA908

LOCATION: Provincial Park Dock on the West side of the lake.

GAUGE TYPE: Staff Gauge.

PERIOD OF RECORD: 1974 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE:

YES/

REMARKS:

1. Alberta Environment operated "Pigeon Lake at Ma-Me-O Beach" 1969-72. There are also on file unverified data for the period 1929-69. Water levels at this site are slightly lower than levels at the Water Survey of Canada gauge due to the Outlet effect.
2. Water Survey of Canada operated 05FA009 and 05FA013, 1924-31 and 1972 to date.
3. Geodetic Elevations confirmed 1980.

SUMMARY FOR THE YEAR 1982

MAXIMUM OBSERVED DAILY WATER LEVEL, 721.294 METRES ON MAY 7

HISTORICAL SUMMARY

MINIMUM OBSERVED DAILY WATER LEVEL, 721.050 METRES ON DEC 1

WATER LEVELS ARE REFERRED TO GEODETIC SURVEY OF CANADA DATUM

MAX. OBSERVED WATER LEVEL, 721.294 METRES ON MAY 7/82

MIN. OBSERVED WATER LEVEL, 721.050 METRES ON DEC. 1/82

LAKE - STATION DESCRIPTION

STATION NAME: SAMSON LAKE near Hobbema

STATION NUMBER: 05FA910

LOCATION: 43-23-W4 - 8 miles Southeast of Hobbema.

GAUGE TYPE: None. Level established by surveying.

PERIOD OF RECORD: 1974 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE: YES/

REMARKS:

MAXIMUM OBSERVED DAILY WATER LEVEL, 773.515 METRES ON APR 29 MAX. OBSERVED WATER LEVEL 773.515 METRES ON APR. 29/82

MINIMUM OBSERVED DAILY WATER LEVEL, 772.046 METRES ON FEB 18 MIN. OBSERVED WATER LEVEL 771.629 METRES ON OCT. 3/75

LAKE - STATION DESCRIPTION

STATION NAME: SANDY LAKE near Morinville

STATION NUMBER: 05EA914

LOCATION: 55-1-W5 - East side of Sandy Lake, 17 miles West of
Morinville.

GAUGE TYPE: None. Level established by surveying.

PERIOD OF RECORD: 1959; 1961; 1963 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE: YES

REMARKS: Geodetic Elevation verified June 1976. There is a Ducks
Unlimited Control Structure on this lake.

SUMMARY FOR THE YEAR 1982

MAXIMUM OBSERVED DAILY WATER LEVEL, 597.391 METRES ON JUN 8

HISTORICAL SUMMARY
MAX. OBSERVED WATER LEVEL, 597.716 METRES ON JUL 5/75

MINIMUM OBSERVED DAILY WATER LEVEL, 597.198 METRES ON FEB 9

MIN. OBSERVED WATER LEVEL 597.091 METRES ON OCT. 16/69

WATER LEVELS ARE REFERRED TO GEODETIC SURVEY OF CANADA DATUM

LAKE - STATION DESCRIPTION

STATION NAME: WOLF LAKE NEAR EDSON

STATION NUMBER: 07AG906

LOCATION: 48-15-W5-26 km east and 80km south of Edson.

GAUGE TYPE: Staff Gauge

PERIOD OF RECORD: 1981 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE:

YES/No

REMARKS: Geodetic elevation established 1982.

ALBERTA ENVIRONMENT
WATER SURVEY SECTION
EDMONTON, ALTA.

LAKE - STATION DESCRIPTION

STATION NAME: YELLOW LAKE (STATION 0)

STATION NUMBER: 05AJ901

LOCATION: 10-13-W4 - 2 miles South of Grassy Lake.

GAUGE TYPE: None. Level established by surveying.

PERIOD OF RECORD: 1977 - 1982

HYDROGRAPHIC SURVEY MAP AVAILABLE:

YES/

REMARKS: Records available for additional stations on this lake.
There is a Ducks Unlimited Control Structure on this lake.
